July 2021 – May 2022.

Beedev Pvt. Ltd, Mumbai.

Full Stack Flutter  
Developer.

|                                    |   |
|------------------------------------|---|
| Full Stack<br>Flutter<br>Developer | <ul style="list-style-type: none"><li>●Pool Inspections Apps: Pool Inspection Apps do everything from the initial booking, selecting the right Australian Standard, undertaking an inspection, to issuing a report or compliance. Everything is completed and issued on the spot. It even sends your personalized tax invoices automatically. Checked off against a series of basic questions with simple explanations appropriate only to the right Standard, Pool Inspection Apps provides a cloud-based inspection management software that can replace your old paper-based checklist by allowing you to use your office computer, mobile, or tablet. It records all your completed inspection report data, photos, and certificates, and also allows any pre-set inspections to be completed on-site, whether you are online or offline.</li><li>●Automover: Registered surveyors can record Car Survey Reports on their Phones and Tablets. A Car Survey Canvas to mark existing damage on the vehicle with unique markers for Dents(X), Scratches(S), Rust(R) &amp; Cracks(C). Digital Signature Pads for 'Receiver Signature' &amp; 'Sender Signature'. Attach up to 10 images to a Survey Report. Offline Submit Feature: When the device is offline, the Survey Reports are saved offline. Saved Surveys are automatically submitted when the device is online.</li></ul> |
|------------------------------------|---|

|                             |   |                               |                           |
|-----------------------------|---|-------------------------------|---------------------------|
| Jan 2021 – July 2021.       |   | Logicwind Pvt Ltd, Surat.     | Flutter Developer Intern. |
| Flutter Developer           | <ul style="list-style-type: none"><li>●<b>Whiteboard digitization:</b> In a normal scenario, suppose the teacher is writing on the whiteboard and suppose he/she comes between the camera and the whiteboard, it becomes difficult to take notes. Now in this project, an ML algorithm will continuously capture the image of the teacher writing on the board and simultaneously send the image to the server, and then from the server, the written words will appear on the web platform whiteboard. Now, suppose a teacher comes between the board and the camera, the ML algorithm recalls the word return in the previously captured image, and integrates with the live word so that there is no disturbance due to interference.</li><li>●<b>Sneaker E-commerce app:</b> Developed an online sneaker selling app using the open-source Rest API of Sneaker.</li></ul>   |                               |                           |
| Aug 2020 – Sep 2020.        |   | Delta Apps pvt ltd, Varanasi. | Flutter Developer Intern. |
| Flutter Developer           | <ul style="list-style-type: none"><li>●<b>Help Now 24/7:</b> The APP aims to protect the life of a patient who has an emergency. Generally, in times of crisis, we only dial 108 for an ambulance. We cannot guarantee that the ambulance will come on time. So, understanding the situation we developed an app that shows all the ambulances nearby u can just click on the ambulance nearby and it will come to your house if somehow there is a delay due to any circumstances, we can track the ambulance it will show estimated time to arrival if the delay is large, we can cancel the ambulance and can move the patient to a nearby hospital with oneself without wasting any time. The app is based on the Flutter platform, and my job was to design the front end of the app. The app is still in the design phase the key stakeholder is still integrating the ambulance and hospital in the app.</li></ul> |                               |                           |
| PROJECTS                    |   |                               |                           |
| Tech Lead                   | <ul style="list-style-type: none"><li>●<b>Smart India Hackathon 2020:</b> This project is the solution to the textile problem. Which do Manufacturers, Wholesalers, and Retailers currently face? In this project, we designed an app that brings all Textile-related users on one platform. Our app tracks all product deliveries to stop fraud in textiles. It also informs Manufacturers about which products will be in trend in the next season or festival, or month by region. It also generates user GST reports. It provides the search product by Image. The app is based on Flutter, Firebase, and Machine Learning.</li></ul>   |                               |                           |
| Flutter Developer           | <ul style="list-style-type: none"><li>●<b>Khakiwala:</b> Today, the police Servant of our country are ready to serve them without worrying about their family. In which they have difficulty in fulfilling their needs. Keeping these things in mind, the Khakiwala application has been made for Police Servants. The Khakiwala App allows police to access useful information on the go with only Police Breaking News, Daily Videos, headlines &amp; updates on Internal News, Police Activities, Honor of Police, Stories, Police Tech News, Police Laws news &amp; International Police News.</li></ul>  |                               |                           |
